

SUDOKU WEEKLY

Week 8, 2022

www.jvank.nl/Sudokus

Explanation

The solution to a sudoku is a special kind of **magic square**: In each row and in each column the entries add to the same number, in this case, 45.

Only the digits 1,2,3,4,5,6,7,8 and 9 may be used and all nine digits have to appear on each row and in each column. In addition, each of the nine 3×3 blocks that make up the sudoku should also contain these nine digits.

The sudoku itself is a puzzle in which only a few of the digits are given. To solve the puzzle, all missing digits should be reconstructed. A proper sudoku is designed in such a way that it has only one unique solution.

This booklet contains only a special brand of Sudokus named **magic sudokus**. In this type, each puzzle contains one or more grey blocks. These small blocks have a property similar to the sudoku in which they occur: Each row and each column adds to 15 and all nine digits should be present in the grey block.

WEEK 51

Monday

2		7	4		8			
	3	6	2					7
							2	5
6		1					3	
	5	9			3			
4		3			9			
			3					
		4					1	
				1			8	

WEEK 51

Tuesday

			2					
	9	8					5	
	3						1	
						4		
				7	9	5		
						7	3	
		1	8					
8		3						9

WEEK 51

Wednesday

	3				1	6		
2		9				5		
					3			
	7						3	8
8			7					
				5				
			6					9

WEEK 51

Thursday

		6				7
